Put Baking Soda & Hydrogen Peroxide in the Washing Machine: The Reason Will Surprise You

By bestfolkmedicine · 23/01/2019 · 2 min read

Did you know that you can also use the hydrogen peroxide from your first aid cabinet in the laundry room? It is beneficial in whitening whites, brightening clothes, eliminating stains and unpleasant smells, and even disinfecting the washing machine.

The 3 % solution which can be bought in drug stores is the best option for your laundry too. This oxygen-based bleach dissolves in water and it is safe for usage on all washable fabrics with stable dye.

When combined with baking soda, its benefits additionally increase. This substance is capable of making white clothes squeaky clean. And, as it is a natural deodorizer and cleanser, it will soften the water and you need not use too much detergent.

These are the ingredients you will need:

4 liters of warm water

A cup of baking soda

Mix the ingredients in a basin and add the white laundry. Leave them to soak overnight. In the morning, transfer the clothes into the washing machine. Add a cup of hydrogen peroxide and a dash of baking soda into the wash.

Leave it for half an hour like that before you turn on the appropriate washing cycle. Afterwards, dry the clothes as regularly.

Before heading out, do not forget to check out the video below that we decided to share with you so that you can learn more about natural laundry whitening:
