*It's definitely caught the internet by surprise because so many people are finding it hard to solve it.*

*Things are even harder when we start to panic because how we are unable to solve something as simple as guessing triangle shapes?*

ezstandalone.cmd.push(function () { ezstandalone.showAds(130); });

*Originally shared by a Twitter user @jiteshpillaaai, this is a brain teaser that seems to ask a simple question: how many triangles?*

*And, the image that comes with it shows a large triangle that has multiple shapes inside of it thanks to the lines which connect to the main shape.*

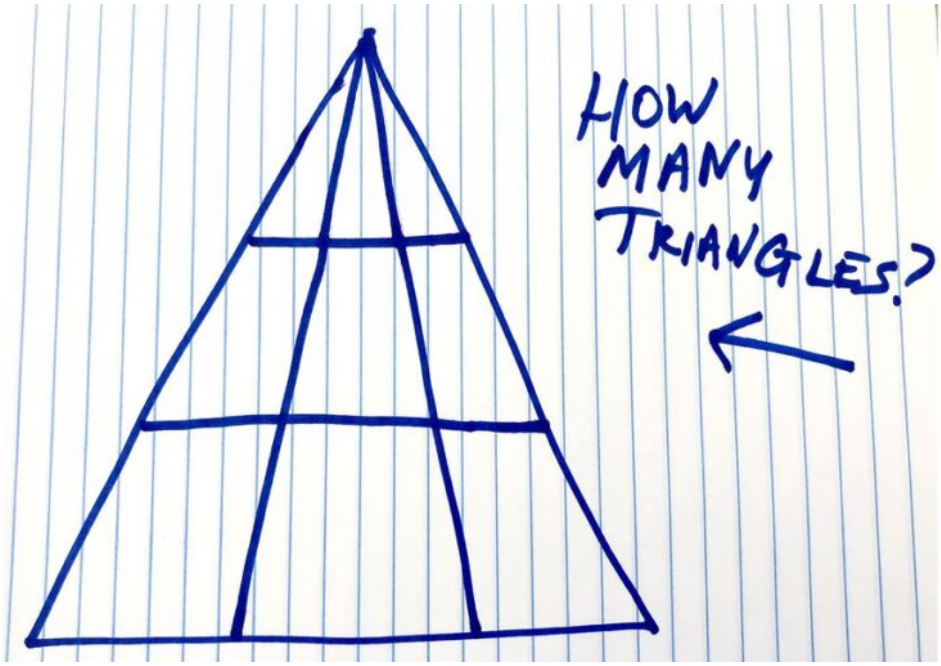

ezstandalone.cmd.push(function () { ezstandalone.showAds(131); });

*At first, you may think, oh, no problem, this seems easy. Let's do it. But, once you get a better look at it, you begin to realize why people have been scratching their heads around it.*

**The How Many Triangles Puzzle**

After checking out the photo, what is your final answer? How many triangles are there on this photo?

ezstandalone.cmd.push(function () { ezstandalone.showAds(132); });

A lot of people guessed it's 4; including 1 big and the 3 smaller ones at the top. However, this isn't the right answer.

Others also suggested that the answer may be 7 because of the several medium-sized triangles in the main shape.

But, this isn't the correct answer either.

**THE ANSWER:**

The correct answer is 18. **There are 18 triangles**. Here's a video where you can easily see why this is the solution:
